

We're with you on the
road to electromobility.

You drive, we care.

A supply concept, that reflects your everyday life...

05

The DKV supply concept suits your everyday life: your charging infrastructure is always there, precisely where you need it.

@ work

During the working day

With our @work solution, you can charge conveniently during the working day. You also profit from favourable commercial electricity prices and underline your credentials in your region as an innovative and environmentally conscious company.

@ home

Overnight, at weekends and on leave

Would you like to offer your employees a charging facility at home? Our @home solution allows them to charge conveniently overnight, outside the working week at weekends or when on leave – and thus eases your way into electromobility. Settling the bill for the domestic electricity used is done transparently through the DKV invoice.

@ road

En route

We can already offer you an extensive network of charging stations in Germany. Journeying throughout the country in your e-vehicle is no longer any problem. Using the DKV CARD +CHARGE, plug-in hybrid vehicles also have access to the largest fuel station network in the industry.

Set-up: your own charging infrastructure, quickly and easily...

DKV Euro Service is with you every step of the way into the exciting world of electromobility. From needs analysis, installation of hardware to easy billing. True to our motto "You drive, we care".

@ work

1

Your **facility management** team prepares the installation site and lays the cables for your charging posts and wall boxes.

2

In the meantime, you can bring your **e-vehicles** into operation and prepare your employees for the changeover. We can provide you with suitable means of communicating the necessary information, such as guidelines and FAQs.

3

With the cables in place, we supply the **hardware and our installation partners** install and commission the charging posts and wall boxes.

4

Using your DKV customer account, you can integrate every vehicle into the fleet management feature and enjoy **all the advantages of transparency and efficiency** from day one.

@ home

1

Quickly and easily order the @home box for your employees. We do the rest for you – **from pre-check to commissioning**.

2

Next comes the **pre-check**. An experienced installation engineer checks with each employee whether a wall box can be installed or what must be done first in order to install it.

3

Following this, the wall box is installed, brought into operation, tested to see that it is **fully functional** and set up by us for you in the customer portal.

4

Your employees can now recharge conveniently at home. **Reimbursement of the electricity cost** for charging @home is done quickly and conveniently through DKV.

Our products for your fleet...

Made in
Germany

@ home

- ✓ Quick charging up to 11 kW
- ✓ Charging period of approximately 120 minutes (depending on the battery capacity and charging speed of the electric vehicle)
- ✓ Activation by the DKV CARD +CHARGE to ensure simple assignment of charging transactions and refund of costs
- ✓ Fees including hardware, pre-check, installation, commissioning and online-management.
- ✓ Latest technology with the highest safety standards

@ work

- ✓ Quick charging up to 22 kW
- ✓ Charging period of approximately 60 minutes (depending on the battery capacity and charging speed of the electric vehicle)
- ✓ Activation by the DKV CARD +CHARGE to ensure simple assignment of charging transactions
- ✓ Fees including hardware, final installation, commissioning and online-management.
- ✓ Wrapping in your brand design on request

Our charging posts and boxes work quickly, reliably and in compliance with German calibration law.

Modern hardware for safe charging:

- ✓ **Wall box** with a charging point, charging station with two charging points
- ✓ **Ingress protection type:** IP 55 for indoor and outdoor installations
- ✓ **Calibration law-compliant meters** record consumption accurately to the kWh
- ✓ **Smart meter** with measurement of charging performance and energy for **efficient charging management**
- ✓ **Safe technology** through the use of residual current circuit breakers, DC-current monitors, miniature circuit breakers
- ✓ for **short-circuit** and **overvoltage** protection

For fuel and electricity: DKV CARD +CHARGE

The DKV CARD +CHARGE combines all the advantages of a traditional fuel card (including vehicle washing, parking and much more) with the additional possibility of charging your vehicles. You have access to an extensive charging network in Germany and the neighbouring countries, which is being extended to form one of the largest charging networks in Europe!

The quickest way to the nearest charging point: the eCharge+ App*

- ✓ Find and activate charging transactions
- ✓ Up-to-date, dynamic display of the acceptance network and the available charging points

* One-time registration is required to use the eCharge+ App in the DKV design. Please register directly through the fleet manager feature in the DKV COCKPIT or send your full name, e-mail address and card number by e-mail to app-login@dkv-mobility.com.

Cost trends, energy use, charging and fuel transactions – our customer portal shows you all the important information at a glance. Made available every day, up-to-date and exactly suitable for your needs. Some of the features we are developing to make this possible:

Quicker overview: the dashboard

- ✓ All information at a glance
- ✓ Information on the status of the charging infrastructure
- ✓ Cost trends from electrification.

Full transparency: the cost overview

- ✓ All costs at a glance:
@road, fuel (for plug-in hybrids),
@home and @work.

For hybrid vehicles: plug-in monitoring

- ✓ Record all charging and fuel transactions
- ✓ Ensure fuel savings and charging efficiency
- ✓ On request: e-mail notification of irregularities

Practical: refund of home charging consumption

- ✓ Accurate recording of the energy used when charging at home
- ✓ Settlement using your employees' electricity prices
- ✓ Simple updating of your employees' electricity tariffs
- ✓ Refund based on travel costs invoicing or have this done through DKV
- ✓ Transparent DKV invoice

Keep an eye on your fleet:
• the DKV customer portal.
